

MODEL: DEVKIT-ECM-001 | **DESCRIPTION:** MICROPHONE DEVELOPMENT KIT

FEATURES

- 4 detachable evaluation boards
- 1 analog MEMS that is compatible for ECM drop-in replacement
- 1 noise cancelling, 1 unidirectional, & 1 omnidirectional ECM included
- plated through hole I/O terminals for multiple testing options

EVAL BOARD

	circuit	technology	output	acoustic port	size dia (mm)	sensitivity typ (dB)	current typ (μA)
CMM-3312AT-44308-TR	MIC5	MEMS	analog	top	3.3	-44	80
CMR-2747PB-A	MIC6	ECM	analog	top	6.0	-47	500
CMC-6015-47P	MIC7	ECM	analog	top	6.0	-47	500
CMC-4013-SMT-TR	MIC8	ECM	analog	top	4.0	-42	500

OPERATIONAL INSTRUCTIONS

The CUI electret condenser microphone (ECM) evaluation board consists of four independent microphone evaluation circuits. One of the microphones is constructed to be noise cancelling, one is constructed to provide unidirectional sound capture, one is constructed to provide omnidirectional sound capture and the fourth microphone is an analog output MEMS microphone with the two pin connections configured in a similar manner to the ECMs. External bypass capacitors are included on the power supply rails of the evaluation boards and DC blocking capacitors are placed in the analog output signal paths.

A DC power supply of 2~10 Volts should be connected between the VDD and GND pins for the ECM evaluation circuits. A DC power supply of 1.6~3.6 Volts should be connected between the VDD and GND pins for the MEMS microphone evaluation circuit. The recommended operating voltage for all of the evaluation boards is 2 V. Please refer to the respective data sheets for additional information regarding each of the microphones.

ELECTRICAL

parameter	conditions/description	min	typ	max	units
directivity	omnidirectional				
sensitivity (S)	at 94 dB SPL, 1 kHz	-47	-44	-41	dB
supply voltage (V _{DD})		1.6	2.0	3.6	V
current consumption (I _{DSS})	V _{DD} = 2.0 V		80		μA
sensitivity reduction	V _{DD} = 3.6 ~ 1.6 V		-0.5		dB
frequency (f)		100		10,000	Hz
signal to noise ratio (S/N)	at 94 dB SPL, 1 kHz (A-weighted)		58		dB
total harmonic distortion (THD)	at 94 dB SPL, 1 kHz		0.2		%
acoustic overload point (AOP)	at 10% THD, 1 kHz		105		dB SPL
output impedance (Z _{out})	at 1 kHz			300	Ω

Notes: 1. All specifications measured at 23±2°C, humidity at 55±20%, unless otherwise noted.

CUI offers a one (1) year limited warranty. Complete warranty information is listed on our website.

CUI reserves the right to make changes to the product at any time without notice. Information provided by CUI is believed to be accurate and reliable. However, no responsibility is assumed by CUI for its use, nor for any infringements of patents or other rights of third parties which may result from its use.

CUI products are not authorized or warranted for use as critical components in equipment that requires an extremely high level of reliability. A critical component is any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.
